

## Ali Marjaninejad

Brain-Body Dynamics Lab,  
University of Southern California  
Los Angeles, California 90007  
Cell: (213) 536-3159  
E-mail: [marjanin@usc.edu](mailto:marjanin@usc.edu)  
Web: [valerolab.org/marjani](http://valerolab.org/marjani)  
g-scholar: [goo.gl/6kSyRT](https://scholar.google.com/citations?user=6kSyRT)

## Education

**University of Southern California**  
Ph.D. Biomedical Eng. GPA: 3.95/4.0,  
**Expected: August 2020**  
M.Sc. Electrical Eng.  
GPA: 3.88/4.0, Track: **Data Science**  
**Amirkabir University of Tech.**  
M.Sc. Biomedical Eng.  
GPA: 4.0/4.0, Track: **Signal Proc.**  
**Sahand University of Tech.**  
B.Sc. Electrical Eng.  
GPA: 3.8/4.0, Minor: Biomedical

## Skills

- Programming: Proficient in Python, MATLAB
- Machine Learning: Proficient in feature extraction, Supervised, Unsupervised, and Reinforcement Learning and Optimization: SVM, Neural Networks, Decision Making, Clustering, Classification, Regression methods, Policy and Value based methods, Genetic Algorithm, etc.
- Hardware design: Experienced in bio amplifiers, analogue filters, PCB design, and microcontrollers

## Software and toolboxes:

 TensorFlow, Keras, Scikit-learn, Open AI gym and baselines, Numpy, Pandas, SciPy, Matplotlib, and Bokeh libraries, MuJoCo-py

 DSP, DIP, Deep Learning, Optimization, and Statistics toolboxes + Simulink

**MuJoCo** physics simulator, PSpice, Eagle Cad, Adobe Illustrator, Adobe Photoshop, Microsoft Office

## Related Coursework

- Estimation theory
- Statistical signal processing
- Advanced digital signal processing
- Biological signal processing
- Pattern recognition
- Computational intelligence
- Foundations of artificial intelligence
- Cognition and brain physiology
- Advanced studies of the nervous system
- Neural implant engineering
- Medical imaging systems
- Medical image processing
- Neuromechanics

## Highlights:

- 10+ peer-reviewed publications including a research paper being featured on the cover of the March issue of “*Nature Machine Intelligence*” and a “*Springer Nature*” book chapter on advanced robotics
- 6+ years of experience in Machine Learning, Algorithm development, Robotics, and Biological Signal Processing: Time and Frequency domain analysis, Multi-dimensional signal processing, Pattern recognition, Supervised, Unsupervised, and Reinforcement learning

## Honors and Awards

- USC Provost’s fellowship; the most prestigious fellowship at USC (Duration: 2015 – 2019)
- USC Grad. school’s Research enhancement fellowship recipient; The most competitive PhD research award at USC (2018 – 2019)
- Society for Brain Mapping & Therapeutics (SBMT) and Brain Mapping Foundation Student Outstanding Leadership and Service Award (2019)
- USC Stevens center for innovation’s “Best Commercial Potential” award for the work done on bio-inspired autonomous robots (2019)
- USC Grad. Student Government’s International Student Recognition Award (2018)
- Appeared on the *Wired magazine* for my role in the neuromorphic quadruped robot project (2018)
- Featured on USC news for instructing MATLAB classes for students in the SHINE program (2016)
- Awarded the Certificate of Appreciation from the Deputy Minister of Science for my active role in the “Bioelectric” journal (awarded as the best national student journal of 2009 - Iran)

## Professional Experiences

- Internship as a Data Scientist at Neural Analytics (Summer 2018)
  - Worked on algorithms to improve the search speed and efficiency of the robotic brain scanner
  - Designed machine learning protocols to enable robotic system to make data driven clinical decisions
- Internship at the MRI section of the exclusive service provider for the General Electrics Healthcare company in Iran (Tajhizat Pezeshki Pishrafteh, 2011)
  - Contributed to both hardware and software Installation, repair, and maintenance
  - Mastered the general principles of physics of imaging modalities especially the MRI; Mastered image processing in MATLAB
- A.I. Residency offer from Google X (2019)
- Research Assistant at Brain-Body Dynamics Lab: Exploring the neuromechanics of the hand and its representation in human cortex (2016 – present)
  - Finding sensory motor representations on human brain in EEG, ECoG, and Single Unit Activity (SUA) signals
  - Showed that a linear mapping can efficiently describe the relationship between finger positions (joint angles) and signal power in different frequency bands of ECoG recordings
  - Used Genetic Algorithm (GA) to find optimal tendon excursion values in a tendon-driven robotic limb (with unknown parameters) to follow a desired trajectory
  - Addressed the long-standing problem of redundancy in the anthropomorphic neuromechanics using optimization and dimensional reduction approaches
  - Developed the Neuromechanics toolbox in MATLAB environment as a complementary toolbox for the book: Fundamentals of Neuromechanics
  - Led two groups of interns in hardware and software development projects; resulted in peer-reviewed publications and raising research grant funding
- Attended Computational sensory-motor neuroscience (CoSMo) and Health data exploration (HDE) summer schools (2017, 2018)
  - Received competitive merit-based fellowships to attend each program
  - Trained to work with bigdata, neural data, and health related data by the most famous leaders of the field
- Research assistant at intelligent signal and data processing lab: Biological and Array signal processing (2012-2015)
  - Used SVM and Neural Network regressors to predict the direction of arrival of a sound wave to a microphone array system
  - Collected a database of microphone array recordings using Persian vocabulary and implemented a MATLAB toolbox that increased speech recognition ratio using beamforming; the project was later integrated successfully in industry
- Instructed three subjects (Microprocessors lab, Circuits design lab and Electronics design lab) at Amirkabir University of Technology and holding two **MATLAB workshops per year at USC**

## Certificates

- Health, Technology, and Engineering (HTE) certificate, USC
- Data Scientist with Python accomplishment certificate, **DataCamp** (in progress)
- ISO 13485 Internal audit training certificate, **Oxfordcert**. Registration Number: TIA1331509010

## Services and Memberships

- Assistant editor of *Paladyn, Journal of Behavioral Robotics* – De Gruyter
- President of the student branch of the Society for Brain Mapping & Therapeutics (SBMT) at USC
- Vice president of the Iranian Graduate Student Association (IGSA) at USC
- IEEE Student member
- Society for Neuroscience (SfN) student member
- American Society of Biomechanics (ASB) student member
- References are available upon request
